Intercomp has been a leader in the design and manufacturing of dynamic scale systems for over 20 years, and we have continued to develop greater capability, reliability and accuracy into all of our products. Our Weigh-In-Motion (WIM) scales utilize the same reliable strain gauge load cell technology found in each of our wheel and axle scales. Proven, high-quality construction methods, coupled with continued software advancements, ensure Intercomp WIM Scales produce the most consistently accurate data in the industry.

Weigh-In-Motion Scale Systems allow the rapid axle weighing of large numbers of vehicles. WIM systems are available in both manned and unmanned configurations and can be used to ensure proper weight distribution and vehicle weight compliance. Individual axles, axle groups, and gross vehicle weights are all screened simultaneously for maximum protection against weight-related citations. Intercomp manufactures Weigh-In-Motion solutions for both High-Speed (HS-WIM®) and Low-Speed (LS-WIM®) applications.

Intercomp WIM solutions include both portable and in-ground scales and hardware, and are available in both standalone and fully-integrated system configurations. Additionally, Intercomp WIM systems are compatible with third-party software and vehicle identification technologies (cameras, RFID, etc.)

Intercomp's partners and distributors continuously uncover new and exciting applications for WIM technology. By combining economical hardware with a significant reduction in installation costs, Intercomp proudly provides your customers with innovative alternatives to traditional axle and truck scales (non-legal-for-trade).

The Axle Weighing Specialist

Intercomp has implemented a quality systems management program aimed at providing customer satisfaction and continual product and business improvement. Our certification of this internationally recognized standard demonstrates our commitment to the quality of our products and services.

# Strip Sensors

## Strain Gauge Weigh-In-Motion Sensors

Weigh at Low and High Speeds

Accuracy of < 2-3% GVW Error (Sensor Configuration & Speed Dependent)

No Excavation, Concrete, or Drainage Required

Minimal Maintenance

Individual Sensors Provide Built-in System Redundancy

Manned & Unmanned Operation

### Strip Sensor Applications

Trucking Distribution Centers

Seaports & Rail Terminals

Overloaded Vehicle Prevention

Verification of Commodity Deliveries

Weight-Based Access Control

Intercomp's Strip Sensors utilize strain gauge technology, which is widely accepted as the most accurate and reliable means to weigh a vehicle. Depending on sensor configurations and vehicle speeds, Intercomp's Strip Sensor Systems provide consistent GVW accuracies of 2-3%. Intercomp's Strip Sensors feature a minimally-invasive design and can be installed and fully operational in the same day, significantly reducing both site downtime and construction costs.

Strip Sensors systems can be configured to report weight and vehicle data to IntercompWIM Software, or be integrated (via API) directly into an existing data system.

### Sample Sensor Configurations

Dimensions: 69" x 2.8" x 3.0" (1.75 x 0.07 x .075 m)

Low-Speed Weigh-In-Motion Axle Scale System

IP67 Protection

Static Accuracy of ± 0.1%

Dynamic Accuracy of 1-2% at  
Speeds Up to 6 Miles per Hour (10 km/h)

Available in Capacities up to 100,000 lb  
(45,000 kg)

150% Overload Protection

LED Display w/Stop-Go Light

- 6-Digit, 4.5" (115 mm) Alpha/Numeric LED Display
- 5" (127 mm) Stop & Go Light
- Displays in lb or kg

CERTIFIED  
CLASS III

SOLAS  
SOLUTION

Fast, Accurate Axle & Gross Weighing for All Vehicle Types

LS-WIM® Weigh-In-Motion Axle Scale Systems are an ideal alternative to full-length static truck scales. Intercomp's US-made LS-WIM® system is designed for use in either manned or unmanned applications. The scale can be easily switched between dynamic (in-motion) and static (axle-by-axle) weighing modes, and can provide both individual axle weights and total gross weights. Intercomp's LS-WIM® provides both operational improvements and data-collection efficiency, all at an economical price point due to its small footprint and minimal installation requirements.

LS20™ WIM Indicator

- Stores 250 Truck IDs w/Tare Weights, Individual Axle Weights & Total Gross Weight
- Data Storage Capacity of 1,500 Weigh Records, 36 Axles Per Record
- Provides All-in-one Standalone System Operation
- Weather-Resistant Enclosure

LS20™ Key Fob

- Used to Activate the System Remotely as the Truck Approaches the Scale
- Transmits the Vehicle's Unique I.D. & Saved Vehicle Information Associated
- Allows the Vehicle to Proceed to Collect Weight Data

A- Platform: 156" x 29.5" (3.96 m x 0.74 m)

B- Frame: 162.9" x 46.4" x 12.5" (4.14 m x 1.18 m x 0.32 m)

Portable Weigh-In-Motion Scales

IP67 Protection

Dynamic Accuracy of 2-3%

Capacity of 30,000 lb (15,000 kg) per Pad

150% Overload Protection

Scales Machined from Aerospace Grade Aluminum for Durability

Ramps/Levelers Roll Up for Easy Transport

The LS630-WIM™ can accommodate nearly any vehicle up to 36 axles and collects individual axle weights and Gross Vehicle Weight (GVW). At vehicle speeds up to 6 mph (10 km/h), the system offers an accuracy of 2 to 3% and  $\pm 0.5\%$  in static mode. Wide pads allow for accurate results without the hassle of precise wheel placement, including axles with dual tires. A pair of RFX® Wireless Weighing pads, four roll-up ramps and a wireless indicator, or PC software, can fit in the back of a vehicle and be set up in less than 15 minutes.

Systems Include:

Two (2) Low-Profile Weigh-In-Motion Scales

Four (4) Roll-Up Ramps/Levelers

Interconnect Power/Communication Cable

189039	WIRELESS LED DISPLAY W/PT20 TRANSCEIVER (FOR SYSTEM #153005)		17 LB (8 KG)	\$3,495.00

Collect accurate axle weights and compute Gross Vehicle Weight (GVW) while the vehicle remains in motion. Levelers/Ramps keep axle group on a level plane when crossing scale pads.

IntercompWIM™

IntercompWIM™ Software automates the creation, screening, and data-logging of a vehicle's speed, axle-spacing, and axle and gross vehicle weights.

For vehicle screening needs, users establish axle and/or gross weight limits, specific to customizable vehicle classes, and are visually alerted if overweight conditions are detected. For inventory management needs, users can effortlessly track commodity inventories with the automated calculation of a transaction's net weight. Both the screening and inventory management functions can be used simultaneously.

Users can also integrate vehicle identification technologies such as LPR (License Plate Recognition) Cameras and RFID. Alternatively, for applications with a scale attendant available, the attendant can type-in vehicle recognition information in real time. While vehicle recognition is crucial for some applications, it is not required for WIM system operation.

Whether inclusive of vehicle identifiers or not, time-stamped records are saved automatically, allowing hassle-free data exporting as well as the generation of printed tickets and customized reports.

- Compatible with Both Portable & In-ground WIM Systems
- Supports Bidirectional Traffic Use of WIM System
- Automated Vehicle Classification Based on Axle Spacing
- Calculates Net Weights Based on Saved or Entered Tare Weight

IntercompWIM™ Delta

IntercompWIM™Delta builds upon the weight-compliance screening, inventory management, and reporting strengths offered in the IntercompWIM™ software, by adding additional capabilities designed for in/out weighing and multiple scale lane applications.

IntercompWIM™Delta automatically pairs two vehicle records with matching vehicle identifiers, then calculates and assigns net and tare weights to the associated outbound record. Whether weighing-in loaded and leaving empty, or vice versa, IntercompWIM™Delta automates the process of tracking net commodity weights entering or leaving a facility.

- Includes all IntercompWIM™ Software Capabilities
- Automated Calculation of Net & Tare Weights by Comparing Matching Vehicle Records
- Capable of Pairing Records from Two Separate Scale Systems

Intercomp is the world leader in wheel and axle scales and is "The Axle Weighing Specialist" of the weight and measurement industry. Among the innovations during our 40-plus years serving the market, the company introduced and patented the first fully-digital, portable wheel load truck scale in the early 1980s. This fundamentally changed the transportation industry by giving commercial vehicle operators the opportunity to check wheel, axle and gross vehicle weights, without the need for a full-length truck scale. With that innovation, transport professionals had the ability to ensure commercial vehicle weight compliance anytime, anywhere.

Many features of the PT300™ wheel load scales can be found in the products Intercomp offers today, including a tough, heavy-duty design built to withstand heavy use on a variety of surfaces. Every scale pad conforms to IP67 standards for moisture and debris intrusion, providing an extended, high-performance service life in nearly any environment. Innovations perfected over the last two decades, like RFX® Wireless Weighing and solar battery recharging, have kept Intercomp products ahead of the competition due to superior reliability and ease of use. Professionals who demand the best trust Intercomp because each product is held to strict quality control standards, enforced at the company's Minnesota-based production facility.

Our wide selection of portable scales helps customers maintain compliance with legal weight restrictions, optimize payload to improve efficiency and safety, and save operating costs by tracking inbound and outbound shipments.

Self-Contained, High-Capacity Portable Wheel Load Scales

PT300™ scales have set the bar for portable, self-contained, compact wheel load scales for decades. Used to maximize legal payloads and reduce maintenance due to overload stress on equipment, these all-aluminum, fully-equipped electronic scales are capable of weighing up to 25,000 lb (11,300 kg) with an accuracy of ± 1%. Each scale features RFX® Wireless Weighing communication between scales and remote indicators and solar charging panels that virtually eliminate the need to manually recharge batteries between uses. PT300™ scales can also weigh dual-tire configurations by placing the scales under the outside tires, with the inside tires suspended in the air.

Compatible with a variety of Intercomp devices, see pages 46-51.

## Self-Contained, High-Capacity Portable Wheel Load Scales

Built with the same technology as standard PT300™ scales, PT300DW™ scales are wider to accommodate dual or super-single tires and are available in capacities up to 40,000 lb (20,000 kg). Standard features include rugged all-aluminum construction with accuracy of  $\pm 1\%$ , RFX® Wireless Weighing, built-in solar charging panels, and IP67 Protection.

***Compatible with a variety of Intercomp devices, see pages 46-51.***Pad Dimensions: 14" x 22" x 3" (356 x 559 x 76 mm)  
Overall Dimensions: 20" x 26" (508 x 660 mm)

## PT300DW Scale Pads

*Scale prices do not include charging cables, please see below for information.*

PART #	DESCRIPTION	CAPACITY/GRADUATION	SHIPPING WEIGHT	LIST PRICE
181506-RFX	PT300DW WIRELESS SOLAR WHEEL LOAD SCALE (5K X 5)	5,000 X 5 LB (2,500 X 2 KG)	62 LB (28 KG)	\$2,295.00

IP67 Protection

Accuracy of ±1% of Reading

Available in Capacities to 30,000 lb (15,000 kg) per Pad

Large LCD Display with Backlight for Easy Readings from Scales

Low-Profile Height of  
1.5" (38 mm) for 5K, 10K or 20K Scales  
1.7" (43 mm) for 30K Scales

Rechargeable AA NiMH Batteries  
Included (4 per Scale)  
*Solar Power Provides up to One Year of Battery Life with Daytime, Outdoor Use (Up to 250 Hours without Solar Power)*

Integrated Indicator with Comprehensive Push Button Controls Include:  
On/Off, Local/Total, Zero & Print/Accum

### Low-Profile, Lightweight Digital Wheel Load Scales

Weighing 51 lb (23 kg) with a profile of just 1.5" (38 mm), the LP600™ Low-Profile Wheel Load Scale Family weighs loads up to 30,000 lb (15,000 kg) with an accuracy of ± 1%. They also feature fully-integrated RFX® Wireless Weighing Technology making it possible to sequentially couple and number scales, as well as link them to a multitude of Intercomp weighing indicators. Built in solar charging panels virtually eliminate the need to manually recharge batteries between uses.

*Compatible with a variety of Intercomp devices, see pages 46-51.*

LP600™	Pad Dimensions:	15" x 22.5" x 1.5" (381 x 569 x 38 mm)
	Overall Dimensions:	18.5" x 33.25" (470 x 845 mm)
LP630™	Pad Dimensions:	15" x 30" x 1.7" (381 x 762 x 43 mm)
	Overall Dimensions:	18.5" x 40.3" (470 x 1024 mm)

Ramps/Levelers Roll Up for Easy Transport

Portable Weighing Solution for Checkweighing & Compliance

The LP600-15T™ system weighs axle-by-axle in static mode, using just two scales, while extension levelers keep axle groups on a level plane, providing ±1% accuracy. The system is ideal for customers weighing heavy vehicles on improved surfaces. It can be transported in the back of a vehicle and set up by one or two people in under 15 minutes.

Includes:

- 2 Low-Profile Static Scales
- 4 Roll-Up Leveling Mats
- 2-Scale Universal Charger

Compatible with a variety of Intercomp devices, see pages 46-51.

LP600-15T Scale Systems (Includes 2 Scales & 4 Roll-Up Ramps/ Levelers)

Scale prices do not include charging cables, please see below for information.

Axle Load Scales

IP67 Protection

Accuracy of ±0.1% of Reading

Available in System Capacities Up to 180,000 lb (80,000 kg)

RFX® Wireless Digital Scales: Cable-Free Digital Scales for Efficiency & Safety  
Analog Scales: Calibrate Scales to Most Industry Indicators

Aluminum or Steel Construction

Modular Design to Accommodate Multiple Axle Configurations

Low-Profile Height:  
3.6" (91 mm) for 30K Scale Pad  
5.5" (140 mm) for 50K Scale Pad

Ramps Measure 18" (457 mm)

Commercially-Available D Alkaline Batteries  
Last up to 300 Hours in Scales

Low-Profile Weighbridges in a Variety of Lengths

Rugged AX900™ weighbridges are available in a variety of lengths, capacities and configurations to weigh anything from single to multi-axle vehicles in locations where permanent scale installations are not feasible. Cable-free operation is made possible with RFX® Wireless Weighing communication back to a variety of devices, while digital output still allows for cable backup. The AX900™ series utilizes stainless steel shear beam load cells to weigh loads up to 180,000 lb (80,000 kg) with an accuracy of ±.1%.

*Compatible with a variety of Intercomp devices, see pages 46-51.*

This image shows a full page of blank graph paper. The background is a very light gray, and it is covered by a grid of thin, darker gray lines. The grid consists of small, equal-sized squares that extend across the entire visible area of the page. There are no margins, text, or other markings present.

## WHEEL LOAD SCALES

When using wheel load scales, including the PT300™, PT300DW™ and LP600™, Intercomp recommends that an axle group be on the same plane. All axles in a group, including dual, triple and spread axles, should be at the same level as the axles on the pads, either supported by another scale pad or a leveling pad.

**System Benefits:**

- Portable, Cost-Effective Method to Weigh Vehicles
- Axle Weights Easily Obtained
- Accurate Weights on Multiple Surfaces

### How To:

1. Stop Vehicle and place scale pads just ahead of wheels to weigh
2. Drive up onto pads and stop before driving over pads
3. Read weights on scale display or RFX® Wireless Weighing indicator

## STATIC WHEEL LOAD SCALES WITH LEVELERS/RAMPS

Portable levelers allow collection of axle weights and Gross Vehicle Weight (GVW) using only two scale pads. The levelers keep various axle groups on a level plane when crossing the scales.

**System Benefits:**

- Levelers Allow for More Accurate Weights When Using only Two Scale Pads
- More Efficient Throughput with Drive-On/Drive-Off Capability
- Ideal for Mobile Check Weighing Operations

**How To:**

1. Place scale pads, one on each side of vehicle, to accommodate vehicle width
2. Install drive-on and drive-off ramps
3. Drive vehicle on to scale, stopping on each axle
4. Collect weight data for each axle & accumulate to determine GWW

## DYNAMIC AXLE SCALES

Collects accurate axle weights and computes Gross Vehicle Weight (GVW) while a vehicle remains in motion. Levelers/Ramps keep axle group on a level plane when crossing scale pads.

### System Benefits:

- Smaller Footprint than Full-Length Truck Scales
- Axle, GVW and Side Weights Easily Collected
- In-Ground and Portable Options Available
- Saves on Additional Fuel Being Burned by Vehicle Idling While in Line

### How To:

1. Deploy portable pads, levelers and indicator for portable system; or activate in-ground system
2. Approach scale at required speed and continue over scale system at a constant speed
3. Axle weights collected in real time as vehicle passes over pads
4. Access or save automatically accumulated GVW and individual axle weight data

## STATIC AXLE WEIGHBRIDGES

Semi-portable axle weighbridge modules can be utilized to measure single axles or obtain axle group weights. Modules can be matched to accommodate virtually any axle group configuration.

### System Benefits:

- Semi-Portable Design Minimizes Space Needed for Weighing
- More Efficient Throughput with Drive-On/ Drive-Off Capability
- Possible to Integrate with Existing Scale Indicators

### How To:

1. Place scale pads, one on each side of vehicle, to accommodate vehicle width
2. Drive vehicle on to scale, stopping on each axle or axle group
3. Collect weight data for each axle/axle group or accumulate for GVW

**Tri-Axle – 14'**  
Example Scale Configuration

**Dual-Axle – 7'**  
Example Scale Configuration

## LEVELING RAMP CONSIDERATIONS

When using wheel load or axle scales, Intercomp recommends axle groups, all axles within 10 feet (3 meters), are on level plane with the scale pad. In other words, even those axles *not* on a scale, must be at the same height as those on the scale. Intercomp Roll-Up Ramps/Levelers (part # 160165 & 160168) allow for accurate weighing while being easy to transport and store.

- Standard Semi-Truck configuration consists of three axle groups: Semi-Tractor Steer Axle, Semi-Tractor Dual Axle & Semi-Trailer Dual Axle
- When scales are deployed, consider variables like space needed for vehicle approach, departure and any height restrictions
- Below are examples of how scales should, and should not, be set up

In-Ground Scale Installation

Key Factors to Consider When Planning a Site

- 1. Length of Vehicles to be Weighed
- 2. Speed of Vehicles to be Weighed
- 3. Roadway Approach Distance (Vehicle Length plus Approach Speed Length)
- 4. Roadway Departure Distance (Vehicle Length plus Recovery Speed Length)

LS-WIM® AXLE SCALE APPROACH & DEPARTURE

PAVEMENT SURFACE CONDITIONS FOR INSTALLATION

Flat Roadway Surface

Uneven Roadway Surface

Roadway Grade Must be <1.0%

LS-WIM SCALE LEVEL

Scale is Even with Roadway Surface

Scale is Above Roadway Surface

Scale is Below Roadway Surface

A Portable Solution to Weigh Bulk Materials & Equipment

With a billet aluminum scale surface designed to withstand increased pressure, the PT300HD™ Portable Scale provides a heavy-duty, portable and affordable solution to capture weights of heavy machinery and other oversized objects. These scales are fully electronic and capable of weighing up to 40,000 lb (20,000 kg) with an accuracy of ±1%. The PT300HD™ Portable Scales also feature attached wheels for easy movement and adjustment. The scale is compatible with a host of other products, including the PT300™ and AX900™.

Compatible with a variety of Intercomp devices, see pages 46-51.

6061-T6 Billet Aluminum Pad Surface Resists Damage from Point Loading

Ideal for Unimproved Surfaces with Roller Wheels for Easy Transport

Large LCD Display with Backlight for Easy Readings from Scales

Rechargeable AA NiMH Batteries Included (4 per Scale)  
Solar Power Provides up to One Year of Battery Life with Daytime, Outdoor Use (Up to 250 Hours without Solar Power)

Integrated Indicator with Comprehensive Push Button Controls Include:  
On/Off, Local/Total, Zero & Print/Accum

Accuracy of ±0.1% of Reading

Commercially-Available Batteries  
Last up to 150 Hours in Scales

15" x 15" x 4" (381 x 381 x 100 mm)  
RFX™ Wireless 6061-T6 Billet  
Aluminum Scale Pads

- Includes:**
- Four SW™ Scale Pads
  - Wireless Indicator to Fully Control Scale Functions: Handheld Weighing Indicator or PT20™ CPU
  - Batteries

PT20™ CPU      HH60™ Indicator

### Highly Portable & Versatile Weigh Pads

SW™ Series Scale Systems are designed for weighing anything from tractors to mobile homes and shipping containers. The scales are ideal to ensure weight limit compliance, avoid overload fines, ensure accurate information for consumers and reduce stress on equipment.

### Efficient, Economical Aircraft Weighing System

Intercomp's ACII™ Series features fully-integrated RFX® Weighing Technology. The Handheld RFX® Wireless Indicator controls scale functions at safe distances. Users can zero scales, change scale and indicator settings, turn scales on or off and calibrate right from the handheld indicator. The RS232/USB output allows data-streaming to printers, displays, computers and process control devices.

Economical, High-Performance Digital Crane Scale

With large, easy-to-read LED displays, CS1500™ high performance crane scales are available in capacities to 10,000 lb (5,000 kg), are NTEP certified, and boast best-in-class battery life. The scales come standard with RFX® Wireless Weighing Technology, enabling cable-free control and monitoring of scales. The CS1500™ also features USB/RS232 output, multi-scale communication, and a multitude of remote display options.

Minimal Headroom, Wireless, Overhead Load Management

The TL8500™ Series Tension Link scales from Intercomp are the industry standard for verifying, controlling and monitoring overhead loads and line tension, while helping to maintain a safe work environment.

These tension links, with a self-contained LCD display, are machined from aircraft-grade aluminum, or stainless steel, with shock-mounted electronics in a NEMA 4x/IP65 weatherproof enclosure. Intercomp's Tension Link scales are built to last in capacities up to 160,000 lb (80,000 kg)

Compact, Highly-Portable Platform Scale

Intercomp's CW250™ Platform Scales are equipped with fully-integrated RFX® Wireless Weighing Technology and are ideal for a variety of weighing applications. Available in capacities ranging from 150 lb (75 kg) to 2,000 lb (1,000 kg), the scales are battery operated, rugged and can be deployed exactly where they are needed. Rechargeable "AA" NiMH batteries last up to 300 hours in scales, minimizing down time due to battery replacement.

- Large, Easy-to-Read LCD Display on Scale
- lb/kg Conversion at the Touch of a Button
- RS232/RS485 Output to Printer or Display
- Includes "AA" NiMH Batteries & Universal Charger

HH400™ (IWH) RFX® Indicator  
Communicate with up to Four Scales

- Store & Recall Up to 100 Records & Offers Continuous & On Demand Print Outputs
- Large, 3.3" (84 mm) Graphic LCD Display with Backlight

HH60™ RFX® Indicator  
Communicate with Up to Six Scales

- Communicate with iOS Mobile Device via Bluetooth® Technology
- Uses RFX® Communication Between Scale Pads & Indicator
- Offers Continuous & On-Demand Print Outputs
- Display Lock to Save Preferences for Future Weighings
- 0.5" (13 mm), Backlit, Display Characters
- "Read-Only" Selection for Use in Tandem with Other RFX® Wireless Indicators

Easy-to-use indicators communicate with scales with a 300' (90 m) line-of-sight range and display weights in a variety of ways, while allowing control of scale functions. Commercially-available, AA batteries last up to 40 hours.

Capable of cabled or wireless configurations, the PT20™ CPU is ideal for customers wanting an all-in-one weight data processing center for monitoring and controlling loads. Its standard USB/RS232 output enables the PT20™ to communicate wirelessly with a variety of devices, including displays and scoreboards, saving time and improving safety. Displays Scale Layout or Scale List with Weight Units, Total Weight and Center of Gravity or Gross, Net, Tare (GNT). The software allows four optional user info fields and seven optional vehicle info fields that display when printed and automatically computes altitude and latitude corrections.

The TS30™ CPU provides the ability to easily process weight-related data for monitoring and controlling loads in a self-contained weather-resistant hardened case. Featuring USB or Ethernet output, the TS30™ can communicate with a variety of devices, including PC's and scoreboard displays, using RFX® Wireless Weighing technology that saves time and improves safety. The CPU can show the scale layout or list with weight units, total weight and center of gravity. Additionally, gross, net and tare weights can all be viewed on the large touchscreen display. The software allows five configurable user/session info fields and five optional vehicle info fields that are included on the ticket created by the built-in printer.

Weights Can be Read Automatically via the Optional USB Wireless Node

Weighing View

Records View

Design View

- Displays up to 32 Scales & 15 Dynamic Weighing Fields in Real Time
- Variety of Display Options, Including Peak Values per Scale, NET/Tare Values & Accumulative Modes
- Export any Single Record via .xml, Excel or Text File
- Control Scale Functions Including On/Off & Zero
- Customize Reports

IntercompWeigh™ Software communicates directly with a variety of Intercomp scales and indicators. Users can manage weighing processes, view scale data, customize layouts and generate reports in one, easy-to-use program. This full-featured software allows users to set up any scale configuration to keep track of item inventories, create procedures to maintain processes, or generate customized, detailed records for future analysis. Weight data can be received wirelessly by combining IntercompWeigh™ with Intercomp's wireless node.

Our headquarters in Medina, Minnesota (USA) offers a full service center and certified technicians providing complete repair, support and calibration for all Intercomp products. Featuring high-precision, fully-automated force calibration systems with capacities to 50 tons and tension calibration systems with capacities to 250 tons, we calibrate scales and systems with standards traceable to the U.S. National Institute of Standards and Technologies (NIST). Intercomp also maintains an inventory of over 20,000 pounds in dead weights used for testing and calibration which are certified by the Minnesota Department of Weights & Measures.

For customers located in Europe, Middle East and Africa, Intercomp has a sales and service center in the United Kingdom. Calibration capabilities include dead-weight and fully-automated forces of up to 50 tons with standards traceable to the Bureau International des Poids et Mesures (BIPM).

Both calibration and repair facilities are regularly audited as part of our ISO 9001:2015 Certification.

Recommended Calibration Intervals

Intercomp recommends all scales, including wheel load scales, axle scales, hanging scales, crane scales and tension links, undergo a recalibration procedure every 12 months. Included in this are Intercomp WIM (Weigh-In-Motion) scale systems. Recalibration procedures can be performed by many of our dealers, or at our factory in Medina, Minnesota.

Recertification Intervals

Scales purchased with an NTEP Certification are recommended to have yearly recalibration and recertification, dependent on use, to retain certification status. Recertification intervals for particular products may differ and can depend on application. Customers should consult their scale dealers for details. Scale dealers can check with their state department of weights and measures to ensure compliance with local and federal regulations.

On-Site Calibration

For facilities or applications that require frequent calibration capabilities, Intercomp offers Force Measurement Test Stands for purchase. These systems have been utilized by worldwide maintenance organizations for calibrating a variety of scales. Contact a sales representative for more information

AFFILIATIONS

QUALITY

**ISO 9001:2015 Registered**  
Intercomp has implemented a quality systems management program aimed at providing customer satisfaction and continual product and business improvement. Our certification of this internationally recognized standard demonstrates our commitment to the quality of our products and services.

**NTEP - National Type Evaluation Program**  
Many Intercomp products carry the distinguished honor of NTEP certification. These products have demonstrated the ability to meet requirements for commercial weighing and measuring equipment for various applications.

**SOLAS (Safety of Life at Sea) Solutions**  
IMO SOLAS Chapter VI guidelines for Verified Gross Mass (VGM) for container weights went into effect July 1, 2016. Be compliant with Intercomp's recommended SOLAS Solutions which meet Method 1 and Method 2 standards.

**IP (Ingress Protection) Ratings**  
These standards aim at providing customers with detailed information for product performance and avoiding confusing general terminology. Many Intercomp products meet and exceed industry IP rating expectations.

What are IP Ratings?

An IP Number is used to specify the environmental protection of enclosures surrounding electrical equipment. These ratings are determined by specific tests. An IP rating is comprised of two numbers, the first refers to the protection against solid objects, and the second against liquids. Simply put, the higher the numbers, the better the protection.

Solid Object Protection	Liquid Object Protection
0 No Protection	0 No Protection
1 Protected Against Objects up to 50 mm <sup>3</sup>	1 Protection Against Vertically Falling Drops of Water (e.g. Condensation)
2 Protected Against Objects up to 12 mm <sup>3</sup>	2 Protection Against Direct Sprays of Water up to 15° from Vertical
3 Protected Against Objects up to 2.5 mm <sup>3</sup>	3 Protection Against Direct Sprays of Water up to 60° from Vertical
4 Protected Against Objects up to 1 mm <sup>3</sup>	4 Protection Against Water Sprayed from all Directions - Limited Ingress Permitted
5 Protected Against Dust, Limited Ingress (No Harmful Deposit)	5 Protection Against Low-Pressure Jets of Water from all Directions - Limited Ingress Permitted
6 Totally Protected Against Dust	6 Protection Against High-Pressure Jets of Water - Limited Ingress Permitted (e.g. Ship Deck)
	7 Protection Against the Effects of Immersion at 1 m for 30 minutes
	8 Protection Against Immersion Under Pressure at 1 m for a Time Specified by Manufacturer

Thank you for the opportunity to provide you with Intercomp products and solutions. We understand how our products and customer service reflect on your business and we are committed to:

- 1. Providing Exceptional Customer Service**  
When you have questions about our products, we want to answer them right away. We will leverage more than 40 years of application expertise and commitment to create a positive customer experience every time you engage Intercomp. Our aim is to provide you with answers so you can quickly and accurately respond to your customer's needs.
- 2. Employing the Best People to Serve You**  
We maintain a team of knowledgeable and experienced employees to enhance the customer experience. To maximize the effectiveness of our support team, we invest in the tools and training they need to better serve you.
- 3. Embracing Change and Seeking Continuous Improvement**  
Our customers are our most important asset and we rely on your feedback to remain market leaders and to improve our products and services. We invite your suggestions and strive to incorporate them into our design and business processes.
- 4. Delivering on Quality**  
We are an ISO 9001:2015 registered organization and believe the path to success starts and ends with providing quality products and services that help our customers solve challenging problems. We realize you have many choices in scale products, but when you recommend Intercomp to your customers, we must deliver quality to achieve customer satisfaction.

To be considered an Intercomp dealer and be eligible to purchase products in this price book at prevailing dealer discounts, Intercomp requires that your business:

- Is a scale dealer in good credit standing actively distributing multiple brands of scales.
- Is a business name registered and approved as a dealer by Intercomp.
- Demonstrates brand loyalty by actively promoting the use and purchase of Intercomp scale products from this price book to prospects and customers.
- Prominently displays Intercomp logo and keeps product information up-to-date in advertisements or other printed material, showroom displays and on dealer website.
- Publishes prices not less than Intercomp M.A.P. policy on advertisements, displays, websites or related e-commerce sites.
- Registers with Intercomp any customers who are resellers or dealers who list the Intercomp name, logo & products on their websites or any related e-commerce websites and ensures they comply with Intercomp M.A.P. and/or special pricing policies.
- Provides Intercomp product warranty for products it sells and follows Intercomp warranty & return policy.
- Complies in full with Intercomp Terms and Conditions of Sale.

## INTERCOMP'S MINIMUM ADVERTISED PRICE (MAP) POLICY

We recognize that our valued dealers invest time and resources to deliver an extraordinary customer experience through knowledgeable staff and compelling service. To support those efforts, Intercomp has policies to help our dealers maintain necessary margins and remain competitive in the global market.

To protect dealer product investment and Intercomp's pricing strategy and copyrighted materials, we have adopted a MINIMUM ADVERTISED PRICE POLICY (MAP Policy). As the name implies, a MAP Policy entails that any Intercomp products advertised should never be listed with a price below the allowed minimum advertised price of 10% off of list price noted in the Intercomp Product Guide & Price Book. Companies found in violation of this, or found using Intercomp copyrighted material without permission will be asked to correct the situation in a timely manner or they run the risk of no longer being allowed to sell Intercomp products. Intercomp established this MAP Policy due to the fact that advertising and promoting Intercomp products primarily on the basis of price could be detrimental to the Intercomp brand as well as dealers' service and support efforts. The MAP Policy does not stipulate what either the dealer or reseller's sales price should be as doing such could be in violation of the law. The dealer or reseller remain free to determine the sales price.

### Official Policy and Guidelines

1. Intercomp dealers are expected to police and enforce this policy with any of their affiliated resellers, and provide these resellers with a copy of this policy. Intercomp dealers are also expected to register any affiliated resellers with Intercomp (this includes any registered company name and/or e-commerce site other than the business name of the authorized dealer). Failure to do so could result in these resellers having to remove Intercomp images, information, and products from their website.
2. Intercomp recognizes that any authorized Intercomp dealer or reseller can make its own decisions to advertise and sell any Intercomp product at any price it chooses without consulting Intercomp. Intercomp similarly has the right to make its own decisions regarding dealer and reseller participation at any time, including permission to use copyrighted materials including logos, product images or information.
3. Listing a price lower than the MAP retail price next to the featured MAP Product in any advertising will be viewed as a violation of this MAP Policy. This MAP Policy applies to all advertisement of MAP Products in any and all media.
4. It shall not be a violation of this MAP Policy to advertise that customers may "call for price" or "email for price."
5. Intercomp reserves the right to modify or suspend the MAP retail price with respect to the affected products for a specified period of time by providing notice to all affected dealers or resellers.

## TERMS AND CONDITIONS OF SALE

Intercomp Co. ("Seller")

**GENERAL.** These Terms and Conditions apply to all sales of goods ("Goods") by Seller to any proposed Buyer ("Buyer"). Any additional or different terms and conditions proposed by the Buyer are objected to and hereby rejected, notwithstanding any terms and conditions that may be contained in any purchase order, acknowledgment, notice, communication or other Buyer form, unless such additional or different terms are expressly accepted by Seller in writing, signed by an authorized officer of Seller.

Acceptance by Buyer of any goods from Seller shall be considered acceptance of these Terms and Conditions. If these Terms and Conditions, or any related documents from Seller, are deemed to be a response to a Buyer document, then notwithstanding any additional or different terms that may be embodied in Buyer's document, Seller's response is expressly conditional on Buyer's consent to the additional and/or different terms and conditions set forth in these Term and Conditions. If these Terms and Conditions are not acceptable to Buyer, Buyer must notify Seller in writing at once.

**VERBAL ORDERS.** Verbal orders are accepted only on the terms herein and in Seller's order acknowledgment. Any discrepancies between Seller's order acknowledgment and the Buyer's verbal order are not binding on Seller. PLEASE REVIEW INTERCOMP'S ORDER ACKNOWLEDGMENT CAREFULLY.

**PAYMENT.** Unless otherwise stated in Intercomp's order acknowledgment or quotation, all invoices are due 30 days after the invoice date. Past due accounts will be charged interest at 1.5% per month, but not more the maximum interest rate allowed by law. In no event is Buyer authorized to audit Intercomp (i) financial records, documents, or papers and/or (ii) processes or documentation related to trade secrets.

**SHIPPING DATES.** All shipping dates represent only a reasonable estimate of the time required for manufacturing at the time of order acceptance or quotation. These dates shall not be construed as promises or agreements to ship or deliver goods on specific dates.

**SHIPMENT - RISK OF LOSS.** Except as otherwise provided in Seller's invoice, all shipments will be made by F.O.B. Seller's manufacturing facility in Medina, Minnesota. Shipping and insurance costs are not included in the invoice price and shall be paid by Buyer. All goods are shipped at Buyer's risk. Title to the goods and risk of loss or damage shall pass to Buyer upon tender of delivery to the carrier in Medina, Minnesota. All claims for shortage or for damage in transit must be reported to Seller within 10 days of delivery.

**DELAYS.** Delivery shall be subject to, and contingent upon, strikes, labor difficulties, riot, war, fire, delay or defaults of common carriers, governmental decrees or orders, inability to obtain necessary material or facilities or any other delays beyond Seller's reasonable control. Seller shall not be liable for any losses caused by such delays.

**TAXES.** Seller's prices do not include taxes or other governmental charges with respect to the sale, purchase, delivery, use or transportation of Goods. Any such taxes which Seller may be required to pay or collect under any existing or future law shall be promptly paid to Seller by Buyer upon demand, unless Buyer provides Seller with a properly executed certificate confirming that Seller is not required to collect any such taxes on Buyer's behalf. Buyer will indemnify and hold Seller harmless from any liability, penalties or expenses incurred by Seller as a result of its reliance upon such certificate.

**WARRANTIES AND DISCLAIMERS.** Seller warrants to the Buyer that the Goods shall be free from defects in materials and workmanship for a period of one year from time of shipment except that said warrant shall be for a period of 90 days from the date of shipment as to non-electronic products. If Buyer notifies Seller in writing within the applicable period from the date of shipment by Seller ("Warranty Period") of such a defect in any Goods, and if Seller determines that such Goods are not in conformity with this warranty, Seller will repair or replace such Goods or refund to Buyer the purchase price of such Goods. Any claims not made within the Warranty Period are deemed waived by Buyer. SELLER MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR USE OR AGAINST INFRINGEMENT, ALL OF WHICH ARE HEREBY DISCLAIMED BY SELLER.

**RETURN POLICY.** Goods may not be returned except with the Seller's consent, at its discretion. Any return of Goods to Seller requires a Return to Manufacturer Authorization (RMA) number available from Customer Service at 800-328-3336 or 763-476-2531. Goods returned without an RMA will not receive credit. Standard equipment Goods returned unused within 30 days of shipment in substantially the same condition as when shipped will be accepted by Seller with a full purchase price credit to Buyer less a restocking charge at a minimum of 15%. Seller may, in its discretion, accept returns after 30 days or may accept special order (custom) or used Goods for return, subject to a greater restocking charge.

**LIMITATION OF REMEDIES.** IN NO EVENT SHALL SELLER'S OBLIGATIONS WITH RESPECT TO ANY GOODS EXCEED THE PURCHASE PRICE PAID TO SELLER BY BUYER FOR THOSE GOODS. IN NO EVENT SHALL SELLER BE LIABLE TO BUYER FOR ANY SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGE, LOSS OR EXPENSE (INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS OR GOODWILL), WHETHER SUCH CLAIM IS BASED ON CONTRACT, NEGLIGENCE, STRICT TORT OR WARRANTY.

**INTERNATIONAL TRANSACTIONS.** If the Goods are to be shipped outside of the United States, no shipment will be authorized until Seller has received an irrevocable letter of credit issued to Seller for the entire purchase price of the Goods and issued or confirmed by a bank located in the United States that is acceptable to Seller in its sole discretion. The Convention on Contracts for the International Sale of Goods shall not apply to any transaction subject to these Terms and Conditions.

**GOVERNING LAW/DISPUTES.** These Terms and Conditions shall be governed by and interpreted in accordance with the internal laws of Minnesota. No action with respect to the Goods or arising out of these Terms and Conditions may be brought by Buyer more than one year after the cause of action has accrued. All disputes shall be resolved in state or Federal courts located in Hennepin County, Minnesota.

**EXCLUSIVE AGREEMENT.** No agreement varying these Terms and Conditions will be binding upon Seller unless in writing and signed by an officer of Seller.

**SITE PREPARATION AND CONDITION FOR SERVICES.** If applicable, prior to the date that products are to be installed, Buyer will (a) obtain and pay for all governmental or third party consents, permits, approvals, licenses and public and private easements necessary for Seller's unrestricted access to any site or location needed for delivery and or installation of the Product, and (b) notify Seller in advance of any requirements including all local laws, regulations and/or ordinances to which Seller is or will be required to comply in the rendering of services and in the supplying of Product hereunder. Buyer will be solely responsible for preparation of the site at which Seller will install the product, to any specifications and in accordance with any time schedule stated in the quotation or statement of work. Buyer warrants to Seller that each such site is in compliance with all applicable health and safety regulations and is free from all asbestos and hazardous contamination or pollutants.

**PROPRIETARY DATA RIGHTS.** Buyer will not disclose to any person or entity any written information or data furnished by Seller, or any information disclosed as a result of the parties' discussions, visually or orally, that should reasonably have been understood by Buyer, because of legends or other markings, the circumstance of disclosure, or the nature of the information itself, to be proprietary and confidential to Seller (hereinafter collectively referred to as "Confidential Information"). Buyer shall treat Confidential Information as confidential and proprietary to Seller, prohibit copying, and use such Confidential Information only in connection with fulfilling its obligations under the Agreement. Buyer will not reverse engineer any products and will not use Seller's Confidential Information to assist in creating or attempting to create by reverse engineering or otherwise, the Source Code Programs, hardware designs or manufacturing processes from product provided or to make a new product or system, or repair any product or system except as necessary to support the use of any product supplied by Seller. Buyer will return all Confidential Information to Seller upon completion of its use, or upon Seller's request. Buyer's obligations hereunder will survive the termination, cancellation or final payment of any or all Purchase Orders.

All drawings, data, designs, tooling, equipment, procedures, engineering changes, inventions, trade secrets, copyrights, mask works, source code, object code, patents, patent applications, know-how, computer and/or Software and all parts thereof, trademarks and all other information, technical or otherwise which was developed, made or supplied by or for Seller in the production of any product or the performance of any service sold, rendered or licensed hereunder, including any and all derivative works, will be and remain the sole property of Seller (or its licensors, if any) and Seller may use them for any purpose and for any other person or entity. The term "sale" or "purchase" as used herein will be understood to mean "license" whenever used in connection with such Software or documentation.

(Effective 8/1/2010)

**Limited Warranty Period.** Seller warrants to the Buyer that the Goods shall be free from defects in materials and workmanship for a period of one year from time of shipment from Intercomp except that said warrant shall be for a period of 90 days from the date of shipment as to non-electronic products.

**Terms and Conditions of Limited Warranty.** This obligation is limited exclusively to defective original equipment manufactured or supplied by Intercomp and is subject to the inspection and analysis by Intercomp as to conclusively identify or confirm the nature and cause of failure. Intercomp's responsibility is confined to repair, replacement or credit and does not extend coverage to labor, material or service charges involved in removal or installation of equipment.

Defective components mechanical or electrical will be repaired or replaced at Minneapolis, Minnesota, provided the user ships the equipment freight prepaid to Minneapolis, Minnesota, in accordance with the Intercomp return to manufacturer authorization procedure. Warranty repair of product by dealer when authorized will be paid at a prevailing rate established by Intercomp.

Intercomp reserves the right to incorporate improvements in material and design of the products without notice and is not obligated to incorporate the same improvements in equipment previously manufactured.

Intercomp shall not be obligated under any warranty different from its warranty as set forth herein. The Intercomp warranty is limited to the dealer's initial customer and installation and is not intended to insure to the benefit of a secondary owner in the event of resale.

**Scope of Limited Warranty,** This warranty shall not apply to equipment which:

- A. Has had repairs or modifications not authorized by Intercomp which in Intercomp's judgment has affected the performance or reliability
- B. Has been subject to misuse, negligent handling, improper installation, accident damages by fire, water or act of God.
- C. Has had serial numbers altered, defaced or removed.
- D. Has not followed Intercomp's recommendations for installations or performance specifications for intended application.

**Freight Carrier Damage.** Claims for equipment damaged in transit must be referred to the freight carrier. Visible damage should be reported immediately. Concealed damage should be reported as soon as possible or in any case, within ten (10) days of receipt of shipment, in accordance with freight carrier regulations.

**RETURN POLICY**

**Standard Equipment.** At Intercomp, we want you to be completely satisfied with any product purchased from us. If it does not work, or is not right, first contact Intercomp to obtain an (RMA) Return to Manufacturer Authorization number. Return the item freight prepaid for full credit replacement less shipping, within 30 days of delivery from Intercomp.

We may, at our option, assess a restocking charge if the equipment was:

- 1. Not correctly specified for the application intended.
- 2. Damaged beyond reasonable recovery.

The restocking charge is directly proportional to the amount of time and material expense required by us to return the item to resale condition. Goods returned unused within 30 days of shipment in substantially the same condition as when shipped will be accepted by Seller with a full purchase price credit to Buyer less a restocking charge at a minimum of 15%.

**Special Order, Modified, Unusual or Non-Stock Items.** We will repair or replace, at our option, equipment which is defective by nature or poor quality materials or substandard workmanship, within the specified warranty period. No returns will be accepted for any special order equipment, or for equipment physically modified or altered in the field. There will be a minimum cancellation fee of 15% for any partial or complete order that is not delivered in its entirety.

**Return Procedure.** When returning equipment for repairs; or warranty reimbursement, these simple steps will help to expedite your request:

- 1. Contact Intercomp Service Department. You will then be issued a (RMA) Return to Manufacturer Authorization number. Returns without an RMA number clearly marked on the outside of the package or packing slip may be rejected at the time of delivery to Intercomp and/or receive no action as to dispensation, credit, repair, etc.
- 2. When preparing equipment for return shipment, complete a Return to Manufacturer Authorization (RMA) form and provide a description of the problem you are experiencing. Be sure to include the Return to Manufacturer Authorization number we provided and enclose the form with shipment. For additional forms, ask the service department to send you a supply.
- 3. Please write the Return to Manufacturer Authorization number on the outside of the package to help us identify the package and effectively move to our Service Department.
